(see product instructions for use)

Basic Supplies/Tools

Beads of your choice
(with hole large enough to
fit over 20ga. wire)
Needle-Nose Pliers
Small Toggle Clasp

Instructions

Project #1044

Jump Rings and Chain

- Step 1:* Using Artistic Wire's Wire Worker, use the larger of the two metal mandrels, make a coil about half the length of the mandrel.
- Step 2:* Remove the coil from the Wire Worker. Using the wire cutters, cut down the full length of one side of the coil to create jump rings.
- Step 3:* To make the chain start by attaching one jump ring to one side of the clasp. Continue attaching jump ring to jump ring and closing each jump ring using the round nose pliers. Continue until desired length and attach other side of the clasp.

Charms and Bead Links

- Step 1:* Using different lengths of wire, make spirals or other designs with the round nose and nylon jaw pliers. Make a loop at the end to attach to the jump rings on the completed chain. Repeat, making as many as you would like.
- Step 2:* Using extra jump rings or create more if needed, slide a bead on an open jump ring. Attach the jump ring with bead to chain and close using round nose pliers. Repeat, making as many as you would like.
- Step 3:* To create hanging bead links cut a piece of wire about 1 1/2" depending on size of bead. Loop about 1/2" of wire around a jump ring on the chain. Bend the wire around itself two or three times using the needle nose pliers and cut of any excess. Slide a bead on the wire. Create a corkscrew or spiral large enough to hold the bead on. Repeat making as many as you would like.
